

Cryogen-free

Sample in vacuum cryostats <4 K to 800 K

These Lake Shore closed-cycle refrigerator cryostats cool the sample in vacuum and are bottom-loading. With a wide range of electrical feedthrough and window options, they are a versatile choice for making cryogenic measurements without using liquid helium.

Key features

<4 K to 800 K

Cryogen-free

Sample in vacuum

Featured components

Choice of cryocooler to match performance and cooling requirements

Integrated control heater and calibrated control sensor

Cryostat models

CCS-100 optical, vacuum

CCS-300S subcompact, optical, vacuum

 $\textbf{CCS-300ST} \ \text{subcompact, non-optical, vacuum}$

CCS-400 optical, high-temperature (500 K), vacuum

CCS-400H optical, high-temperature (800 K), vacuum

CCS-XG low-vibration, vacuum

Complete your system

Temperature control

Included

Every cryostat includes a Lake Shore temperature controller and calibrated sensor.

MeasureLINK control software

Optional add-on

MeasureLINK software enables a wide range of capabilities including charting and logging, system monitoring with a cryostat-specific process view, and controlling Lake Shore equipment as well as third-party instrumentation. No programming required—drag-and-drop to create temperature sweeps, access measurements, and see real-time internal cryostat temperatures in process view.

Source + measure + lock-in

Optional add-on

The Lake Shore M81-SSM provides highly synchronized DC, 100 kHz AC, and mixed DC + AC sourcing and measuring—including both voltage and current lock-in measurement capabilities—for low-temperature material research performed in your cryostat. It supports up to three remote-mountable source and three measure modules per a single M81-SSM-6 instrument and, owing to its modularity, allows signal and source amplifiers to be located as close as possible to the sample being characterized. This minimizes the signal wiring to the sample, reduces noise, and increases measurement sensitivity.

Configure your cryostat

1. Select cryostat

CCS-100 Optical, vacuum

ccs-300SSubcompact, optical, vacuumccs-300STSubcompact, non-optical, vacuumccs-400Optical, high-temperature (500 K), vacuumccs-400HOptical, high-temperature (800 K), vacuum

CCS-XG Low-vibration, vacuum

CUSTOM Custom configurations are available to fit your

experiment needs—contact Sales for details

2. Select cryostat configurations

Sample holders

SH-BLANK-1.5-STD Blank

SH-BLANK-1.5-800 Blank, high-temperature

SH-OPTICAL-1.5-STD Optical

SH-OPTICAL-1.5-800 Optical, high-temperature

SH-RESISTIVITY-1.5-STD Resistivity

CONSULT Custom sample holders

Cold head

Some cold heads have a similar base temperature with no load, but have different cooling powers and are therefore able to handle different heat loads. Consult us for more information.

202 2 W at 20 K bare head cooling power 204 7 W at 20 K bare head cooling power 3 W at 10 K bare head cooling power 204N 101 0.2 W at 4.2 K bare head cooling power 408 1 W at 4.2 K bare head cooling power 412 1.25 W at 4.2 K bare head cooling power 415 1.5 W at 4.2 K bare head cooling power 418 2 W at 4.2 K bare head cooling power

Windows (optical variants only)

Windows are available in multiple thicknesses and materials. See our cryostat window selection guide and contact sales for additional information.

Compressor type

CONSULT Substitute air-cooled compressor in place of

standard water-cooled

3. Select pump (optional)

Each cryostat required a pump to operate. If you do not have an existing pump to use, select one of the pumps below.

10RVPGeneral-purpose mechanical pumping station10DDPGeneral-purpose mechanical pumping stationwith LN2 cold trap and isolation valve

TS-85-D Turbopumping station

4. Select cryostat wiring

We offer a variety of both unwired and wired feedthroughs to complete your measurement setup. Please refer to the cryostat feedthroughs and wiring guide for more information.

Select support

XG-STAND Low-vibration support stand with pulley to

suspend cold head within helium exchange

gas chamber (CCS-XG only)

CONSULT Elastomeric cold head supports—eliminates

need for cold head support stand, but with higher vibration level (CCS-XG only)

CONSULT Cryostat mounting stand for optical table

(included with some models)

6. Select optional system configurations

Measurement instrumentation

Cryostats come standard with one temperature controller.

336 Model 336 temperature controller
335 Model 335 temperature controller
335-3060 Model 335 temperature controller with installed 3060 thermocouple option card
336-3060 Model 336 temperature controller with installed 3060 thermocouple option card
325 Model 325 temperature controller

M81-SSM electronic synchronous source measure system

Contact us for cables and adapters for M81-SSM/cryostat integration.

M81-SSM instrument with X = 2, 4, or 6

channels; half the channels are dedicated to sourcing and the other to measurement; see

modules below

VM-10 AC/DC voltage measure module + lock-in
BCS-10 AC/DC balanced current source module
CM-10 AC/DC current measure module + lock-in

VS-10 AC/DC voltage source module

Select optional control software

ML-MCS MeasureLINK-MCS software with scripting

development license; includes lifetime activation for version purchased and full MeasureLINK capability on up to 5 computers with Lake Shore instrument drivers, chart recorder functionality, and drag-and-drop measurement sequences; some application packs sold separately

8. Select additional accessories

Cryostats come standard with one installed temperature sensor. Other sensors are available—contact us.

CX-1050-CU-HT-1.4M Cernox® magnetic field independent, calibrated

CONSULT Thermocouple (CCS-400/H only)
